VISUAL COMMUNICATION I:
VISUALIZATION & TECHNICAL DRAWING

Section 1

2022-2023 fall
Friday 08:30 – 12:30

Dr. Hakan Tong
Dr. Feyza Ergün
Dr. Orkan Zeynel Güzelci

Res. Assist. Ahmet Türel
Res. Assist. Elif Şen
Res. Assist. Asya Gürgün Özdemir

Syllabus

VISUAL COMMUNICATION I: VISUALIZATION AND TECHNICAL DRAWING

COURSE OBJECTIVE and DESCRIPTION **TES112E Visual Communication 1** course aims to increase the interaction and coordination between the mind and hand. It will be the vital tool to develop and improve your design ideas. Communicating is via sketches, perspectives, use of images, renderings, texts; communicating will work for two partners: allows you to see; and for other people to whom you want to describe your ideas.

The studio will concentrate on introducing you to the media and give you critical experience on how to use it effectively: you will sketch to externalize ideas, draw to map and represent, and then produce and re-produce these productions into eloquent graphics. This semester will provide a solid, heart-felt, and hand-felt foundation of various techniques and approaches to both visualization and representation, of ideas, processes, and relationships. Hence, the course forms a basis for your future development as a planner and designer.

Besides visualization and communication of ideas, two major issues to be covered are “graphics” and “technical drawing”. You will be introduced to the fundamental concepts of graphics – the issues related to the performance of the various elements of a visual or artboard. Technical Drawing on the other hand will allow you to develop your skills in 3D thinking, handling an object in its physicality and in Cartesian space, and effectively mapping formal properties. This will be a fundamental basis for you to understand and communicating – in an architectural manner – various archetypal forms in context and in scale.

COURSE CONTENT In this course, starting from basic elements of design which are Line, form, color, texture, shade, basic and complex geometries various graphical and technical representation techniques will be executed. As this course is a foundation course which aims to improve visualization and technical drawing skills, it is expected from students to draw sketches through the semester in addition to the weekly studio works.

Dimensions and scale, isometric and artistic perspective, visualization, basic graphical elements; composition, collage are subjects of this semester. Added to the principles and techniques of Projection, Sections Elevations, Markers and Symbols, Drawing of Structural Elements by hand and representation techniques will be introduced. This course includes several studio exercises and 10 studies to submit and builds a relation with the project studio work. The assessment of each studio exercises is executed separately.

Additional to the studio studies, there will be a general technical drawing exam across all Sections in the 13th week (Dec.16) of the course calendar. It will comprise 10% of the course grade.

COURSE LEARNING OUTCOMES Students who complete the course satisfactorily will be able to:

- 1) Understand the basic elements of design, theories and systems of color,
- 2) Use colored, fast drawing techniques; prepare effective presentations,

- 3) Express ideas, scenarios, concepts graphically,
- 4) Use 2D and 3D rendering technologies and tool,
- 5) Create freehand sketching and lettering,
- 6) Learn the concept of scale, give dimensions on the drawings,
- 7) Learn the principles of projection, sketch the orthographic views of structural and contextual elements.
- 8) Apply necessary markings and symbols on drawings.

WEEKLY PROGRAM

Week	Day	Subject	Keywords & Basic Principles	Learning Outcomes
1	Sep. 23	introduction + sketch (blind contour)		
2	Sep. 30	sketch (pattern) + documentation (photography)	<i>level of abstraction</i>	1, 3, 5
3	Oct. 07	documentation & mapping	<i>biennale</i>	2, 3, 4
4	Oct. 14	orthographic drawing set	<i>introduction of drawing tools</i>	6, 7, 8
5	Oct. 21	orthographic drawing set	<i>plans, sections, elevations</i>	6, 7, 8
6	Oct. 28	model making workshop	<i>paper based</i>	1, 3, 4
7	Nov. 04	orthographic drawing set	<i>plans, sections, elevations</i>	6, 7, 8
8	Nov. 11	Fall Break	-	-
9	Nov. 18	orthographic drawing set	<i>axonometric, isometric</i>	6, 7, 8
10	Nov. 25	orthographic drawing set	<i>axonometric, isometric</i>	6, 7, 8
11	Dec. 02	typography&styles	<i>poster/graphic design</i>	3,8
12	Dec. 09	typography&styles	<i>poster/graphic design</i>	3,8
13	Dec. 16	Technical Drawing Exam		
14	Dec. 23	introduction to portfolio design + photo and graphic/drawing editing techniques (adobe photoshop)	<i>poster/portfolio design in digital environment</i>	2,4
15	Dec. 30	photo and graphic/drawing editing techniques (adobe illustrator)	<i>poster/portfolio design in digital environment</i>	2,4

COURSE CONDUCT and SUBMISSIONS

The course will be held **in class** during the hours announced in the weekly program [Friday, 08.30–12.30] and in accordance with **any guidelines and precautions of the Covid-19 pandemic if necessary**. Course instructors and students will meet in the allocated studio(s) unless specified otherwise by the course instructors. Each student will have a designated work area during the course hours. General assemblies or presentations

related to the course may be held in the studio using a virtual platform or in one of the conference rooms in Taşkışla.

It is of utmost importance that students keep their working areas clean while in the studio and speckless at the end of the course. **The studio space will be used by another class after ours so it is both courteous and safe to evacuate on time (no later than 12.30) with all belongings and trash.** Please know and comply with [TES Studio Principles](https://tes.mim.itu.edu.tr/studio-principles/). (<https://tes.mim.itu.edu.tr/studio-principles/>)

CLASS HOURS and ATTENDANCE

It is important that students follow the studio. This means being on time and actively participating in the activities held during the course hours under the direction of the studio instructors. There will be a variety of interactive formats so timeliness is essential for an efficient planning and individuals' maximum benefit from peers and instructors. Students are also strongly encouraged to use supporting digital platforms to share multimodal objects and information while interacting with their instructors and peers during studio discussions. All work is to be produced in accordance with the media, material and format requirements set forth by the instructors in the class or in the announcements made through **Ninova** or other designated platforms. All participants are expected to adhere to [the codes of ethical conduct](https://odek.itu.edu.tr/en/code-of-honor/ethics-in-university-life). <https://odek.itu.edu.tr/en/code-of-honor/ethics-in-university-life>

A minimum of 80% attendance is mandatory in studio courses according to ITU Undergraduate Education Regulation Article 23 (Amended: RG-17/6/2021-31514). The 20% is not a right but is reserved for sickness and other unforeseen circumstances.

COURSE TECHNOLOGY

Digital platforms will be used during and outside of class hours to communicate, conduct research, produce and share work. **Ninova (Section's common CRN)** will be used for announcements, access to live or recorded Zoom sessions, and digital submissions. Additionally, instructors may designate other platforms for announcements and sharing work. We also plan to use supporting platforms such as Google Drive and Miro to share work within the class community and collaborate. It is highly advised that each **student has a laptop computer with the necessary equipment/hardware**. Students are advised to use a computer with access to WiFi, a camera, basic word and picture editing software, and sound features.

DISCUSSIONS and PINUPS

Student works are commonly put under the spotlight for discussion. These discussions serve the purpose of articulating the assessment criteria and conveying suggestions for students to develop their work. In these open discussions, students are expected to develop critical perspectives and proactively voice them in the course.

EXHIBITIONS

A selection of student projects will be exhibited digitally both during and at the end of the semester on suitable platforms.

ANNOUNCEMENTS All announcements will be made on the Ninova class interface. Briefs of upcoming weeks' topics and exercises will be given out by section tutors

at the end of the class in each week. These briefs will explain details and expectations for the following weeks exercise, the related home works, various readings and that are expected to be reviewed by the students before coming to class next week. The brief will also entail information on the necessary preparations and material for the upcoming week.

The course will focus on studio works that are designed to progress in a sequential order. Every week will build on the previous, both in terms of ability and techniques, as well as study material: the students output of the preceding weeks studio and home work will form the basis for the following weeks studio exercise.

Students need to actively use their ITU usernames to access these and/or get related notifications from the ITU-Mobile app.

EVALUATION The requirement for active participation in the course is 80%. This includes both physically attending classes and regularly completing the in-term assignments/projects throughout the semester. Students who do not meet these conditions will get VF and cannot make final submission.

Visual Communication I Grade Assessment	Contribution
Submissions during the term (Midterm grade)	%50
Final Submission (Final dossier grade)	%40
Technical Drawing Exam	%10
