VISUAL COMMUNICATION I:
VISUALIZATION & TECHNICAL DRAWING

Section 2

2022-2023 fall
Friday 08:30 – 12:30

Assist. Prof. Dr Ethem Gürer
Assist. Prof. Dr. Pınar Özemir
Assoc. Prof. Dr. Sevil Yazıcı

Res. Assist. Sevgi Altun
Res. Assist. Fırat Küçükersen
Res. Assist. Ferda Özdülger

Syllabus

VISUAL COMMUNICATION I: VISUALIZATION AND TECHNICAL DRAWING

COURSE OBJECTIVE and DESCRIPTION

TES112E Visual Communication 1 course aims to increase the interaction and coordination between the mind and hand. It will be the vital tool to develop and improve your design ideas. Communicating is via sketches, perspectives, use of images, renderings, texts; communicating will work for two partners: allows you to see; and for other people to whom you want to describe your ideas.

The studio will concentrate on introducing you to the media and give you critical experience on how to use it effectively: you will sketch to externalize ideas, draw to map and represent, and then produce and re-produce these productions into eloquent graphics. This semester will provide a solid, heart-felt, and hand-felt foundation of various techniques and approaches to both visualization and representation, of ideas, processes, and relationships. Hence, the course forms a basis for your future development as a planner and designer.

Besides visualization and communication of ideas, two major issues to be covered are "graphics" and "technical drawing". You will be introduced to the fundamental concepts of graphics – the issues related to the performance of the various elements of a visual or artboard. Technical Drawing on the other hand will allow you to develop your skills in 3D thinking, handling an object in its physicality and in Cartesian space, and effectively mapping formal properties. This will be a fundamental basis for you to understand and communicating – in an architectural manner –various archetypal forms in context and in scale.

COURSE CONTENT

The course consists of 11 modules.

Visual Communication 1 course aims to increase the interaction and coordination between the mind and hand; hence it will be the vital tool to develop and improve your design ideas; communicating is via sketches, perspectives, photographs, renderings, texts; communicating will work for 2 partners: for yourself; and for other people whom you want to describe your ideas.

Visualization is the most important and powerful tool for yourself; it will return you back new information and alternatives. You are going to learn to use the analog and digital media effectively; various kinds of paper, pen, pencil types and related software. This semester will provide a solid, heart-felt, and hand-felt foundation of various techniques and approaches to both visualization and representation, of both objects and ideas. Hence, the course forms a basis for your future development as a designer.

Every human is likely to take a pencil and do drawing - weak or powerful - you are not at the 'zero' point; the keyword for this course may be best expressed with 'speed'. Everybody may draw- but you should draw fast, very fast! Only this ability will put you to the designer level. And don't forget, we as designers, architects and planners do not look for or need beautiful drawings, but ones that communicate in the right way.

Additional to the modules, there will be a general technical drawing exam across all Sections in the 13th week of the course calendar. It will comprise 10% of the course grade.

COURSE LEARNING OUTCOMES

Students who complete the course satisfactorily will be able to:
1) Understand the basic elements of design, theories and systems of color,
2) Use colored, fast drawing techniques; prepare effective presentations,
3) Express ideas, scenarios, concepts graphically,
4) Use 2D and 3D rendering technologies and tool,
5) Create freehand sketching and lettering,
6) Learn the concept of scale, give dimensions on the drawings,
7) Learn the principles of projection, sketch the orthographic views of structural and contextual elements.
8) Apply necessary markings and symbols on drawings.

WEEKLY PROGRAM

Week	Day	Subject	Keywords & Basic Principles	Learning Outcomes
1	Sep. 23	SKETCHING EXERCISE	*Sketching basics, (Using different sketching techniques as a tool for Visual Expression)*	1,5
2	Sep. 30	ORTHOGRAPHIC PROJECTION	*Orthographic drawing Basics, (Projection techniques, scale, plan and side views)*	1,6,7
3	Oct. 07	PARAMETRIZED REPRESENTATION	*Parametrized representation: visual calculation-visual rules, (Graphical expression, using 2D and 3D visualization 1, 3, 4, 5 STUDIO RHYTHM tools, freehand sketching)*	1,3,4,5
4	Oct. 14	ORTHOGRAPHIC PROJECTION	*Orthographic drawing Basics, (Projection techniques, scale, plan and side views)*	1,6,7
5	Oct. 21	TECHNICAL DRAWING (FROM SOLIDS TO 2D)	*Technical drawing-multi-view projection, (Parallel projections, isometric, axonometric, dimetric perspectives)*	1,6,7
6	Oct. 28	ANTHROPOMETRIC DRAWING	*Human Scale, Proportion,*	5.6
7	Nov. 04	STORYBOARD	*Storyboard Design Visual Narrative*	3,5
8	Nov. 11	Fall Break		
9	Nov. 18	ADVANCED TECHNICAL DRAWING & SECTIONING	*Sections, elevations, dimensioning*	1,6,7
10	Nov. 25	ADVANCED TECHNICAL DRAWING & SITE PLAN	*Site plan drawing, elevations, dimensioning*	1,6,7
11	Dec. 02	COLLAGE & POSTER DESIGN BASICS	*Visualization techniques*	1,2,3
12	Dec. 09	RENDERING & MOOD BOARD	*Rendering & Modes of Perspective-Textures & Materials. Transform your structure,*	1,3,4,8

			(Visualization of a certain material/texture. Transferring the material know-how to visuals. Adding realism to visuals based on material/texture decisions.)	
13	Dec. 16	**Technical Drawing Exam**		
14	Dec. 23	ATMOSPHERE SKETCHING DIGITAL SKETCHING (Photoshop - Sketch Up)	*Visualization and representation* *Digital media and tools*	2, 3, 4, 5, 8 3,4
15	Dec. 30	PORTFOLIO DESIGN	*Presenting all the projects (contents of all TES 1 courses) using visual communication techniques, (Deciding on the concept. Designing the layout. Coding the content visually and bringing the content together)*	2, 3, 4, 5, 8

COURSE CONDUCT and SUBMISSIONS

The course will be held **in class** during the hours announced in the weekly program [Friday, 08.30–12.30] and in accordance with **any guidelines and precautions of the Covid-19 pandemic if necessary**. Course instructors and students will meet in the allocated studio(s) unless specified otherwise by the course instructors. Each student will have a designated work area during the course hours. General assemblies or presentations related to the course may be held in the studio using a virtual platform or in one of the conference rooms in Taşkışla.

It is of utmost importance that students keep their working areas clean while in the studio and speckless at the end of the course. **The studio space will be used by another class after ours so it is both courteous and safe to evacuate on time (no later than 12.30) with all belongings and trash.** Please know and comply with TES Studio Principles. (https://tes.mim.itu.edu.tr/studio-principles/)

CLASS HOURS and ATTENDANCE

It is important that students follow the studio. This means being on time and actively participating in the activities held during the course hours under the direction of the studio instructors. There will be a variety of interactive formats so timeliness is essential for an efficient planning and individuals' maximum benefit from peers and instructors. Students are also strongly encouraged to use supporting digital platforms to share multimodal objects and information while interacting with their instructors and peers during studio discussions.

All work is to be produced in accordance with the media, material and format requirements set forth by the instructors in the class or in the announcements made through **Ninova** or other designated platforms. All participants are expected to adhere to the codes of ethical conduct. **https://odek.itu.edu.tr/en/code-of-honor/ethics-in-university-life**

A minimum of 80% attendance is mandatory for a passing grade in studio courses according to ITU Undergraduate Education Regulation Article 23 (Amended: RG-17/6/2021-31514). Please note that the designated 20% is reserved for sickness and other unforeseen circumstances.

COURSE TECHNOLOGY

Digital platforms will be used during and outside of class hours to communicate, conduct research, produce and share work. **Ninova (Section's common CRN)** will be used for announcements, access to live or recorded Zoom sessions, and digital submissions. Additionally, instructors may designate other platforms for announcements and sharing work. We also plan to use supporting platforms such as Google Drive, Miro, and Google to share work within the class community and collaborate. It is highly advised that each **student has a laptop computer with the necessary equipment/hardware**. Students are advised to use a computer with access to WiFi, a camera, basic word and picture editing software, and sound features.

DISCUSSIONS and PINUPS

Student works are commonly put under the spotlight for discussion. These discussions serve the purpose of articulating the assessment criteria and conveying suggestions for students to develop their work. In these open discussions, students are expected to develop critical perspectives and proactively voice them in the course.

EXHIBITIONS

A selection of student projects will be exhibited digitally both during and at the end of the semester on suitable platforms.

ANNOUNCEMENTS All announcements will be made on the **Ninova** class interface.

Briefs of upcoming weeks' topics and exercises will be shared by group tutors verbally and also as a document via online platforms. These briefs will explain details and expectations for the following weeks exercise, the related homework, various readings that are expected to be reviewed by the students before next class. The brief will also entail information on the necessary preparations and material for the upcoming week.

In occasional lectures examples of graphic work related to all fields of study will be also be presented in order to enrich the students' visual culture, and to guide them on their personal research at their own times. These lectures will also state the specific day's hourly rhythm, deadlines, congregation times etc.

Due to the large number of students it is of utmost importance to be ready (computers open, logged on, sketch books out etc.) for the classes, and to start and end group congregations on time.

Students are also expected to be ready for tutor group congregations as to enable them to start and end at the planned time. Student attendance will be taken by the group tutor at these congregations.

The course will center on studio works that are designed to progress in a sequential order. Every week will build on the previous, both in terms of ability and techniques, as well as study material: the students' output of the preceding weeks simultaneous and home work will form the basis for

the following weeks studio exercise.

Everyone in the studio is expected to be open-minded both in academic, as well as social terms. Students are promoted to inquire, search for more than that is given by the tutors, and learn from the works and manners of their fellow.

EVALUATION The requirement for active participation in the course is 80%. This includes **both** physically attending classes and regularly completing the in-term assignments/projects throughout the semester. Students who do not meet these conditions will get VF and cannot make final submission.

Visual Communication I Grade Assessment	Contribution
Submissions during the term (Midterm grade)	%60
Final Submission (Final dossier grade)	%30
Technical Drawing Exam	%10
